Frontend Infrastructure Engineer, Payments Product

Help the Payments UI teams at Stripe build, test, and deploy high quality, reliable, and secure experiences.

← **ROLES AT STRIPE**

San Francisco, Seattle, or New York City. Remote in North America only

Full time

Payments infrastructure

APPLY NOW

Stripe offers a variety of ways for developers to accept payments on the web: Stripe Checkout, Stripe.js, Elements, Hosted Invoice Pages, and more. All of these experiences share a common codebase, tests, deploy systems, and other tooling. Our payments products need to be tested and optimized to be in the critical path of millions of online businesses while allowing Stripe's product teams to ship new features quickly. That's where our frontend infrastructure team comes in.

This team empowers developers that work on Stripe's payments UI by providing state of the art developer tooling, testing frameworks, deployment systems, and other platform components to provide a great development experience while ensuring our products are secure and reliable. Although this team is internal facing, you'll see every day how your work enables products used by millions of businesses around the world.

You will:

Improve and overhaul deployment and build systems to keep things running smoothly

Implement state-of-the art cross browser testing to ensure our payments experiences work every time, for every user

Create systems that enable many teams around the world to collaborate on one UI surface while maintaining security and reliability

Bring in tools to improve JavaScript performance and reduce bundle size

Automatically enforce standards around accessibility and internationalization

We're looking for someone who has:

Experience developing and running build, test, and deployment tools in production environments

Experience improving the reliability and/or security of web experiences

Experience working with JavaScript developer tools and their quirks

Empathy, a collaborative spirit, and the ability to work effectively with a team

A desire to sweat the details around security, reliability, accessibility, and internationalization

A desire to solve the needs of your colleagues as part of a platform team

A sense for how to hit the optimal balance between rigor and velocity

An appreciation for the importance of good documentation – internal and external

We look forward to hearing from you

APPLY NOW

At Stripe, we're looking for people with passion, grit, and integrity. You're encouraged to apply even if your experience doesn't precisely match the job description. Your skills and passion will stand out—and set you apart—especially if your career has taken some extraordinary twists and turns. At Stripe, we welcome diverse perspectives and people who think rigorously and aren't afraid to challenge assumptions. Join us.
